***Election/Restrictions***

The reply to the restriction requirement filed on 9-9-02 is not fully responsive to the prior restriction requirement mailed July 3, 2002 because of the following omission(s) or matter(s): Applicants must elect a single sequence from amended claim 11, as previously requested in the restriction requirement mailed July 3, 2002. See 37 CFR 1.111. Since the above-mentioned reply appears to be *bona fide*, applicant is given **ONE (1) MONTH or THIRTY (30) DAYS** from the mailing date of this notice, whichever is longer, within which to supply the omission or correction in order to avoid abandonment. EXTENSIONS OF THIS TIME PERIOD MAY BE GRANTED UNDER 37 CFR 1.136(a).

Applicants argue that the examiner has attempted to reduce the claimed invention to a plurality of nucleotide sequences, and that the view of the claims as embodying a mere collection of nucleotide sequences essentially misconstrues the invention. Contrary to Applicant's assertions, the claimed inventions are properly understood as enzymes with patentably distinct physical characteristics. Each of the sequences claimed represents a chemically distinct enzyme, and, as you state, not simply a collection of nucleotides. A predominant number of the inventions that we examine on a daily basis comprise various nucleotide sequences, are examined in terms of their biological context (e.g. antisense, ribozymes, nucleic acids encoding a particular, translatable gene construct...), and not merely as strings of nucleotides. The instant inventions embodied in claim 11 represent structurally distinct and independent inventions, each comprised of a different and distinct polynucleotide sequence.

Applicants must elect one of the claimed sequences in order to properly fulfill the restriction requirement.
